Go with the bare bones option that does not include the steel plate decking or if you'd prefer add the plate for a small additional cost.

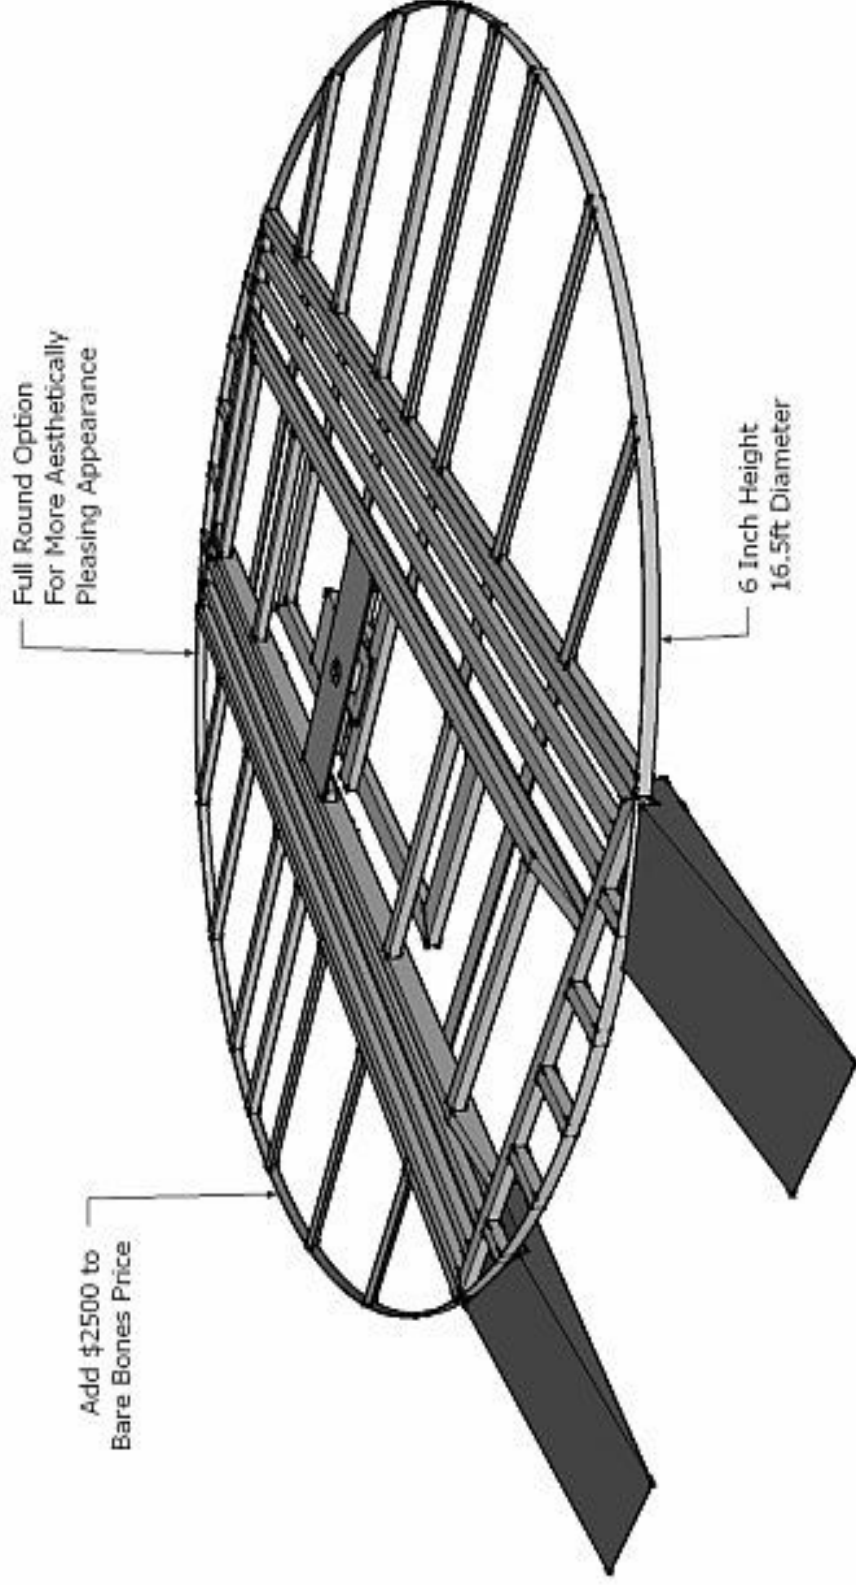

Optional
Diamond Plate
Steel Decking
Add \$450 to Bare Bones

Extremely low to the ground platform height allows for easy and efficient vehicle loading and unloading. Does not require any foundation work, set-up and use on any level surface. Does not use long and heavy steel load ramps but rather light weight high density foam ramps that tip the scales at around 20lbs each.

Photobooth Car Turntable (Round Model)

Round Unit Price: \$7999.00

Dimensions: 16.5ft Diameter, 6in Height

Capacity: 9000lbs

Standard Rotation Speed: 1.5RPM

Ramps: Light Weight High Density Foam

Decking: None

Finish: Black Primer

Round Unit Options:

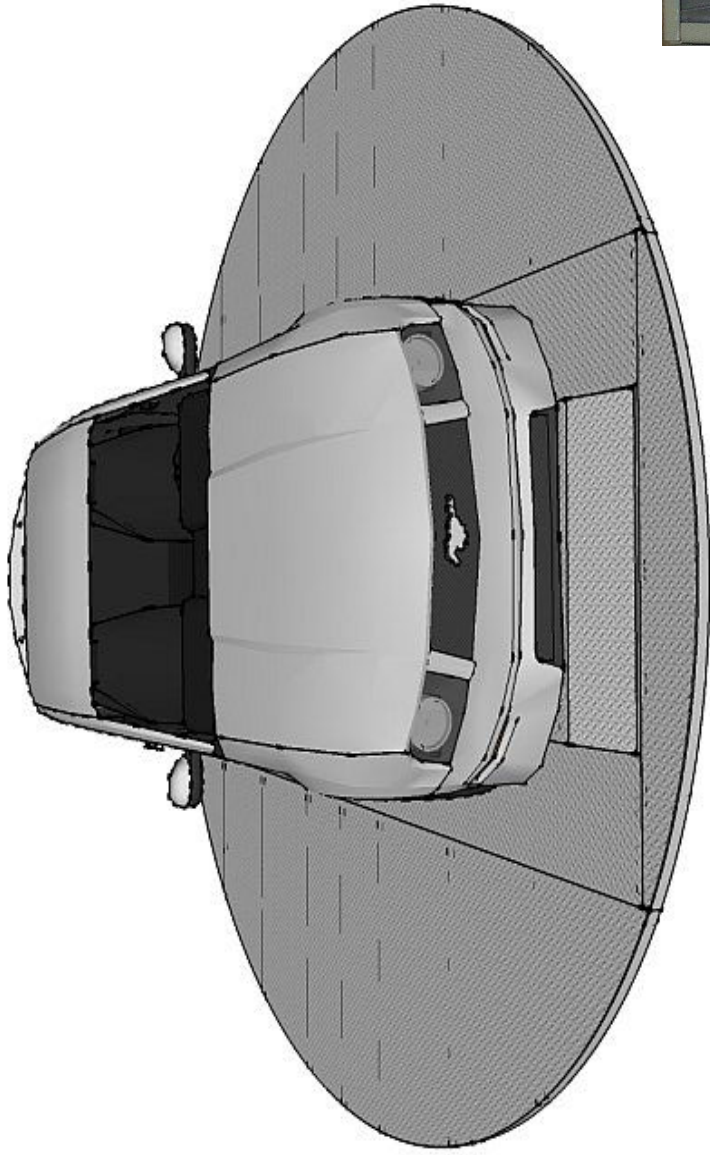

Diamond Plate Steel Decking: \$2250.00

Deluxe Option: \$2500.00 Includes...

Wireless On/Off/Fwd/Rev Controller,

Variable Speed / Rotation Direction Control

Preset Designated Stopping Function

The more aesthetically pleasing round version of this unit can be used to enhance the overall appearance of higher end vehicles and the company's looking to showcase them. Purchase the bare bones version and cover the unit yourself on site or have us fully deck it out with diamond plate steel or 3/4 plywood.

The wireless remote feature includes a junction box that will need to be hung on a nearby wall. Within the box are the controls for the variable speed drive and the wireless relays that power the remote along with an easy to access emergency shut off button.
